

ECMO Study Day

Covering the basic principles of ECMO, aimed at all healthcare professionals. Covering when ECMO is indicated, who benefits from ECMO and when to refer to an ECMO unit. A mixture of lectures given by the faculty from the ECMO team at UHSM NHS Trust, Manchester.

There will be the opportunity to interact with patients who have undergone ECMO treatment and have first hand feedback of their experience. The approach at UHSM is multidisciplinary and this will be shared during the day. ECMO is part of the Intensive Care training syllabus and this will be a useful day for all who are preparing for the FCCM exam.

Programme
